'Mathematics for academic year – Class 5'

Years 5 and 6

	Year 5 children	Year 6 children
Number –	read, write, order and compare	read, write, order and compare
number and	numbers to at least 1 000 000 and	numbers up to 10 000 000 and
place value	determine the value of each digit	determine the value of each digit
	count forwards or backwards in steps	round any whole number to a required
	of powers of 10 for any given number	degree of accuracy
	up to 1 000 000	use negative numbers in context, and
	interpret negative numbers in context,	calculate intervals across zero
	count forwards and backwards with	solve number and practical problems
	positive and negative whole numbers,	that involve all of the above.
	including through zero	
	round any number up to 1 000 000 to	
	the nearest 10, 100, 1000, 10 000 and	
	100 000	
	solve number problems and practical	
	problems that involve all of the above	
	read Roman numerals to 1000 (M) and	
	recognise years written in Roman	
	numerals.	
Number –	add and subtract whole numbers with	multiply multi-digit numbers up to 4
addition and	more than 4 digits, including using	digits by a two-digit whole number
subtraction,	formal written methods (columnar	using the formal written method of
multiplication	addition and subtraction)	long multiplication
and division	add and subtract numbers mentally	divide numbers up to 4 digits by a two-
	with increasingly large numbers	digit whole number using the formal
	use rounding to check answers to	written method of long division, and
	calculations and determine, in the	interpret remainders as whole number
	context of a problem, levels of	remainders, fractions, or by rounding,
	accuracy	as appropriate for the context
	solve addition and subtraction multi-	divide numbers up to 4 digits by a two-
	step problems in contexts, deciding	digit number using the formal written
	which operations and methods to use	method of short division where
	and why.	appropriate, interpreting remainders
		according to the context
	identify multiples and factors,	perform mental calculations, including
	including finding all factor pairs of a	with mixed operations and large
	number, and common factors of two	numbers
	numbers	identify common factors, common
	know and use the vocabulary of prime	multiples and prime numbers
	numbers, prime factors and composite	use their knowledge of the order of
	(non-prime) numbers	operations to carry out calculations
	establish whether a number up to 100	involving the four operations
	is prime and recall prime numbers up	solve addition and subtraction multi-
	to 19	step problems in contexts, deciding
	multiply numbers up to 4 digits by a	which operations and methods to use
	one- or two-digit number using a	and why
	formal written method, including long	solve problems involving addition,
	multiplication for two-digit numbers	subtraction, multiplication and division

multiply and divide numbers mentally drawing upon known facts divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context multiply and divide whole numbers and those involving decimals by 10,

use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.

Number – Fractions

100 and 1000 compare and order fractions whose denominators are all multiples of the same number identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, 2/5 + 4/5 = 6/5 = 1 1/5] add and subtract fractions with the same denominator and denominators that are multiples of the same number multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams read and write decimal numbers as fractions [for example, 0.71 = 71/100] recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents round decimals with two decimal places to the nearest whole number and to one decimal place read, write, order and compare numbers with up to three decimal places solve problems involving number up to three decimal places recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal solve problems which require knowing percentage and decimal equivalents of 1/2, 1/4, 1/5, 2/5, 4/5 and those fractions with a denominator of a

use common factors to simplify fractions; use common multiples to express fractions in the same denomination compare and order fractions, including fractions > 1 add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, $\frac{1}{4} \times \frac{1}{2} =$ 1/8] divide proper fractions by whole numbers [for example, $1/3 \div 2 = 1/6$

1 associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example, 3/8] identify the value of each digit in numbers given to three decimal places and multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places multiply one-digit numbers with up to two decimal places by whole numbers use written division methods in cases where the answer has up to two decimal places solve problems which require answers to be rounded to specified degrees of accuracy recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.

	multiple of 10 or 25.	
Ratio and Proportion	multiple of 10 or 25.	solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison solve problems involving similar shapes where the scale factor is known or can be found
		solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.
Algebra		use simple formulae generate and describe linear number sequences express missing number problems algebraically find pairs of numbers that satisfy an equation with two unknowns enumerate possibilities of combinations of two variables.
Measurement	convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre) understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm2) and square metres (m2) and estimate the area of irregular shapes estimate volume [for example, using 1 cm3 blocks to build cuboids (including cubes)] and capacity [for example, using water] solve problems involving converting between units of time use all four operations to solve problems involving measure [for	solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places convert between miles and kilometres recognise that shapes with the same areas can have different perimeters and vice versa recognise when it is possible to use formulae for area and volume of shapes calculate the area of parallelograms and triangles calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm3) and cubic metres (m3), and extending to other units [for

	example, length, mass, volume, money] using decimal notation, including scaling.	example, mm3 and km3].
Geometry – Properties of Shapes	including scaling. identify 3-D shapes, including cubes and other cuboids, from 2-D representations know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles draw given angles, and measure them in degrees (o) identify: angles at a point and one whole turn (total 360o) angles at a point on a straight line and a turn (total 180o) other multiples of 90o use the properties of rectangles to deduce related facts and find missing lengths and angles distinguish between regular and irregular polygons based on reasoning	draw 2-D shapes using given dimensions and angles recognise, describe and build simple 3-D shapes, including making nets compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.
	about equal sides and angles.	
Geometry – Position and Direction	identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.	describe positions on the full coordinate grid (all four quadrants) draw and translate simple shapes on the coordinate plane, and reflect them in the axes.
Statistics	solve comparison, sum and difference problems using information presented in a line graph complete, read and interpret information in tables, including timetables.	interpret and construct pie charts and line graphs and use these to solve problems calculate and interpret the mean as an average.
