2023 edition

Digital Wellbeing at School

Digital wellbeing can relate to how the use of digital technology including personal devices, social media and other apps can affect an individual's life. It can be affected by many things, such as how long we spend on devices, how we behave online, how we interact with others, how others interact with us, what we expose ourselves to, what we're influenced by and how we use technology to achieve desired outcomes. Much like general wellbeing, it can contribute to other areas such as our overall physical and mental health.

WHY USE TECHNOLOGY?

Employers struggle to fill digital vacancies as only one in 10 workers possess the skills, report finds

Experts say skills shortage stems from rapidly evolving technology and the structure of the UK workforce

4 Cs of online concern (Content)

YOUR DIGITAL PROFILE

'RANDOMERS'

'Teachers and parents need to work together and properly prepare young people for all aspects of digital citizenship.'

[From Metro news](#)

Whisper: An anonymous app focused on sharing personal secrets and meeting new people.

Calculator %: Disguised as a calculator, the app is actually a secret photo vault.

Omegle: A video chat website where users are matched randomly with strangers.

'Through meaningful dialogue about online spaces a normal part of home and school life, we can make children aware of the potential risks, and give them a support network of trusted adults they can turn to if they have a problem online.'

'SHROPSHIRE'

.....pleaded guilty to two counts of attempting to engage in sexual communication with a child and one charge of attempting to cause a child under 13 to watch an image of sexual activity. (January 2023)

'GROOMING'

Groomers might try and isolate children from their friends and family, making them feel dependent on them and giving the groomer power and control over them. They might use blackmail to make a child feel guilt and shame or introduce the idea of 'secrets' to control, frighten and intimidate.

It's important to remember that children and young people may not understand they've been groomed. They may have complicated feelings, like loyalty, admiration, love, as well as fear, distress and confusion.

ROBLOX

NEWS

ROBLOX

Until now Roblox has **7+** by **Pan-European Games Information**.

This has changed to “Parental Guidance Recommended” PEGI !

Additionally, Roblox is introducing **more parental controls** to filter different experiences dependent on the age of the user. This is due to the incredible amount of user-generated content within Roblox, and a change that we’re sure many parents will welcome.

To find out more, you can read [this article](#).

Roblox Condos <https://www.bbc.co.uk/news/technology-60314572>

2 BITS OF ADVICE

1. Disable messages if there are any concerns. Setting can be set to **only talk to known friends**.
2. Set the **parental controls** - moderate who children talk to and which games they can play. To enable these, add your email address to your child's account through the security menu and create a pin to stop settings being altered. In the privacy menu apply moderation to in-game chat, personal messages, invites and more.

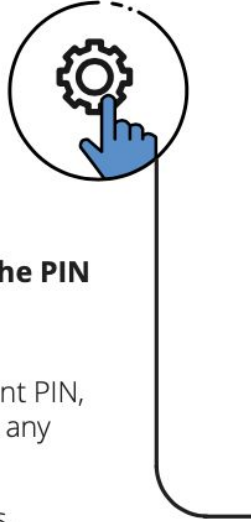

ROBLOX - HOW TO...

Adding a PIN to your account

- Click the **Gear icon** in the upper right corner and click **Settings**
- Select **Security** in the menu on the left-hand side of the screen
- In the **Account PIN** section, press the **Toggle** button
- You will be asked to **create and confirm the PIN**
- When you're done, press **Add**

All account settings are protected by the account PIN, which will need to be entered in order to make any changes.

Creating a PIN requires a verified email address. You will be prompted to add and verify your email if the account does not have one.

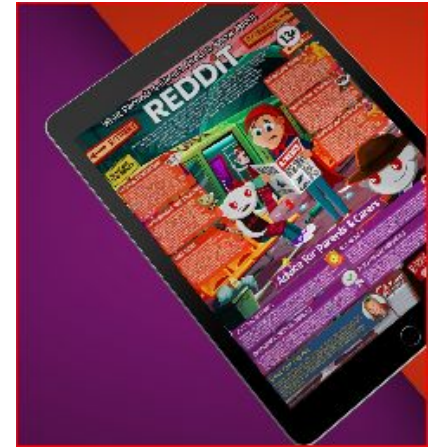

ROBLOX

Use the Roblox checklist to check privacy and safety settings.

SOCIAL MEDIA

- Age restrictions
- Privacy settings
- Sharing information
- Block and report
- BEWARE of Live Streaming

4 risks of using Snapchat

1. People can see exactly where you are in the world unless you are on **ghosted mode** (which you need to set up on settings).
2. **Anyone** can add you and ask to chat **privately** (can be saved as a record) when there is a thick blue line on a private chat it means the person you are talking to has saved the chat .
3. People can do a **screen print of images** sent and then share with others
4. You can limit the **time shown** on your photo to 1 second - unlimited

There is also a **family centre** setting so you can feel more at ease

WHATS APP

Is WhatsApp safe for my child?

- 16 + (due to collection of data)
- Encrypted messages (only the people sending and receiving the messages can read them)
- Phone numbers are available to all
- If someone from the group adds a person they can communicate with all other users

- Best to keep groups small if possible

Is WhatsApp safe for my child?

To prevent children being added to groups by people they don't know, we recommend changing the group settings to **'My contacts except'** and using the tick icon to select all contacts. This option means only your child's phone contacts, except those you exclude, can add your child to groups. But by selecting all contacts, it means that nobody can add your child to a group chat without first sending them an invitation.

In the same section, you can also **switch off 'read receipts'**, which means other people cannot see when you have read their message. This might help if your child is feeling under pressure to respond to messages.

Reimagine the family experience

Modern families come in all sizes and locations. We'll help you keep kids safer online, have fun together, and stay connected—even when you're apart.

Create a family group >

Establishing a family group is an easy, effective way to encourage healthy online habits and manage busy schedules. A family group is a set of individuals connected through the [Microsoft Family Safety](#) app on their Windows, Xbox, or mobile devices.

SCREEN TIME - ADVICE

- Set the rules/ limitations
- Frequent breaks e.g. 40 minute screen time met with an hour break for under 10s
- Five- minute warnings before their allotted time is up
- Take away future screen time if they don't switch off
- Talk to them about why you are removing the screen
- Bonuses for the good screen behaviour
- Switch off an hour before bed
